Test out Rails Admin and ActiveAdmin gems	Marissa	2hr	2		0%	

gigapan api
functionality they want
color and design

Features:
- Multiple level of users (admin, teachers, students)
- ability for teachers and admin to create new projects
- batch upload of students by admin or teachers
- backend database export and queries
- Users can comment with snapshots of the Gigpans of each project
- showcase of active projects
- front end search of projects by name, curriculum area, country
- users are able to change personal info (students have limited ability)
- comments are nested and color coded by user level
- ability to archive projects
- automatic duplicate checking for users and projects
